

Vox Cell Boosters

Cellular and Data signal boosters for your Home and Business

Say Goodbye to Dropped Calls & Slow Data Connections

- Boosts your cellular and data signal up to 32 times
- Provides you with a stronger, more reliable signal
- Improved signal in low lying areas and in bad weather
- Improved signal quality, even if you far from a cell tower

Product overview

Cell phone boosters are a growing market that has gained popularity in the past few years moving from rural areas to urban markets.

Our cell phone signal boosters are ICASA and NRCS approved electronic devices that improve existing 2G, 3G, and 4G LTE signals. Our signal boosters are legal devices that help improve call quality, weak cell signal, and deliver faster data speeds.

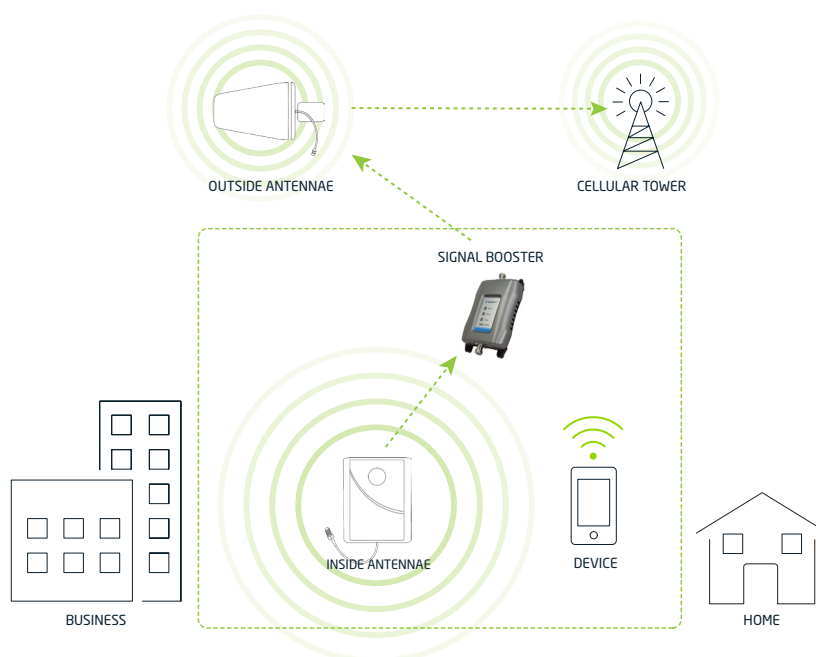

If you tend to have usable signal outside your home or office building, but weak to no signal inside, then a cell phone signal booster will definitely improve your cell service and

signal strength.

The idea of eliminating dropped phone calls, slow data speeds, and unsent text messages without needing to connect to WiFi, argue with your carrier, or switch carriers has many people interested in how cell phone signal boosters work. We have the answers!

Signal boosters also extend the battery life of cellular phones. A stronger signal requires less power to receive and transmit.

How It Works

Visit us at vox.co.za

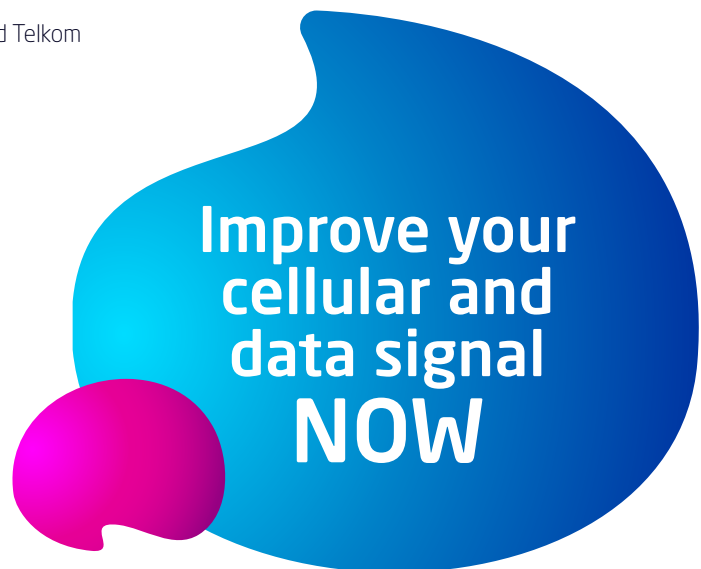

Main Features and Benefits

FEATURE	
Better call quality	Amplify mobile networks signals giving your better signal strength to make and receive high quality calls.
Faster Data Speeds	Amplified signal within your building ensures that you have faster Internet access on your mobile devices.
High selectivity	Signal phone boosters are available in various models for your exact requirements at different prices. GSM signal boosters are relatively cheaper than 3G and 4G signal boosters. You can select and purchase a suitable booster according to your needs.
Installation flexibility	Each building has its specific installation requirements. We will advise you on the required antennas and installation options to meet your needs.
24 hours, 7 days a week support	Enjoy support from our support staff 24 hours a day.

Additional Information

- ICASA approved equipment
- Works for all phones and carriers; ie. MTN, Cellc, Vodacom and Telkom
- Complete kit: all parts included
- It does not need to be connected to any internet source

About Vox

Innovation and insight combine in Vox - a market leading end-to-end integrated ICT and infrastructure provider and telecommunications company. From data to voice - as well as Cloud, business collaboration and conferencing tools - Vox offers

intelligent solutions that connect South Africans to the world, supporting entrepreneurs, customers and commerce, whilst practicing values of integrity, choice and service excellence in all of its dealings. For more information [click here](#).
